

DISINFECTANT TO BE USED:

Product Name : **Sanispray**
Active Ingredient : **Benzalkonium chloride**

Sanispray is a concentrated, all-purpose spray & wipe, formulated with user-friendly and food-safe benzalkonium chloride (also known as “Quat”) to deliver superior sanitizing properties. Sanispray is fragranced and boosted with pure native Australian essential oils to give extra anti-bacterial protection and a fresh natural scent.

Procedure

1. All surface should be cleaned by the client before disinfection to achieve maximum results.
2. **TRES RSZ** will provide the labor, equipment, materials and supervision to complete the job.

NOTE:

Re- entry period will be 2 hours after the treatment.

Disinfection will be applied to all areas of the compound and inside the Units (House) Premises with resident authority.

TRES RSZ Service Technician will render disinfection treatment on the entire premises.
(Excluded holidays)
